DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The negative limitation in these claims “not come into contact with the body” is indefinite as it can be interpreted many ways, as for example an optical pressure sensor or a contact pressure sensor that impacts a body appendage. The claims should be phrased in a positive manner.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3612

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 2, 4-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toyota (JP 2000096913) in view of JP 2002-96637 (cited by applicant) and Matsushita.

Toyota has the pressure sensor/seal 35 along the trunk edge, contacting the body in closed position.

JP 2002-96637 teaches that a piezo sensor 9 may be displaced from the edge of the closure thus not coming into contact with the body when the closure is closed.

Matsushita teaches a determination means in figure 5 for detecting an object.

It would have been obvious to one of ordinary skill to provide in Toyota a displaced pressure sensor, of flexible piezoelectric type (claim 2) on a trunk lid as taught by JP 2002-96637 and further obvious to provide in this combination a determination means as taught by Matsushita in order to safely operate the lid under power without injury.

As to claim 4, a time function based in the determination means is deemed to be common knowledge in this art.

As to claim 6, Toyota has the drive means. Matsushita teaches the control means, with release of pinching being common knowledge in this art in order to reduce injury.

As to claim 7, time delay prior to action is deemed to be common knowledge in this art.

As to claim 8, this distance is not a patentable distinction, but one based on testing in a particular environment and regulatory requirements.

As to claim 9, Toyota has the seal 35.

Art Unit: 3612

4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Toyota in view of JP 2002-96637 and Matsushita as applied to claim 2 above, and further in view of Kramer et al.

It would have been obvious to one of ordinary skill to provide in the references above a nonlinear flexible member as taught by Kramer at 28 in order to tailor the crush characteristic of the cushion.

Response to Arguments

5. Applicant's arguments with respect to claims above have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
